

2022-06-30 Rama's White Knight Reports

June 23, 2022 to June 30, 2022

JUNE 30, 2022

To our readers: Rama's White Knights Report, for the most part, will present information from Rama's contacts on very current events. Sometimes, additional commentary may show up, in the form of more explanation about an important issue, or as an article inserted to provide more insight on the subject being presented.

Find more info on those folks Rama talks to - who are there to keep us in the loop as well - at <https://www.rainbowroundtable.net/rama-s-contacts>

Friday

Lady Nada

Dharamshala

Rama: I received a call from **Lady Nada** at 11:20 am this morning today. She said to me, "Lord Rama, I am here in Dharamshala, meeting with some dignitaries from Bhutan concerning galactic visitations. Regarding the U S news today, the Kangaroo Court - known as the Supreme Court - in a 5-4 decision, overturned Roe v. Wade.

"These false religions and fascist governments have crossed the line with the Great Mother Goddess. She Who Was Here Before the Gods Were Here, comes now! Expect us. You do not ignore us! The Goddess is the Primordial Creatrice. These monster male mortals, by their own choosing, have crossed their own Mother! The Goddess is no longer sitting at the back of the bus: She is driving the bus AND the bus is going to Dracos! 13,000 years of patriarchy no longer stands! Make peace with your god while you still can.

"I will see you, Lord Rama, at the Solar Tribunal on Saturn this Sunday! See you in the Light of the Most Radiant One! All we are saying is give peace a chance! Sat Nam! Namaste! Blaze the Violet Fire!

2022-06-25

Saturday

Mr X

Rama: I received a text message from **Mr X** at 12: 40 pm this afternoon. He said to me, "Lord Rama, I am in Afghanistan at the quake site, helping with rescue operations alongside Fingdel Knor, the Poppy Lady of the galactics, and a team of first responders on the ground."

Mr X continued: "Lord Rama, you remember what Mother said last night: 'I am here to collect my wayward children.' Let us all send the Violet Flame and Blaze the Violet Fire! Let us have Love and Compassion for all these life forms. We have no idea what soul contracts they have made. See you in the Light of the Most Radiant One! Sat Nam! Namaste! Blaze the Violet Fire!"

Monday

Dalai Lama

Dalai.Lama@DalaiLama·Jun 27

Always having feelings of closeness to others and maintaining a loving mind is the sole foundation for building everything we wish for. Focusing on small differences in outer appearances to divide and discriminate is nothing but ignorance.

2022-06-27

Monday

Natasha

Rama: I received a text message from Natasha at 12:20 this afternoon. She said to me, "Lord Rama, on the news, apparently Russia has sent a missile into a shopping centre in Kyiv and the news reported that 10 people were killed, and at least 50 more were injured."

Natasha was saying: "Is this news or is this a cover story by the West for what Zelensky actually did again to his own people? I will look further into this story and get back to you, Lord Rama. Please place all of this in the Circle of Support and Blaze the Violet Fire! We live in such unprecedented times! It is for our highest good to have Love and Compassion for these ones who know not what they do. See you in the Light of the Most Radiant One. Sat Nam! Namaste!"

Tuesday

Tom the Ring-tailed Cat, Sweet Angelique the Cat

Rama: I received a text message from **Tom the Ring-tailed Cat and Sweet Angelique the Cat** at 12:10 this afternoon. They said to me: "Lord Rama, we are in New Delhi, India, and we are checking out the Iron Pillar of Delhi here. This Pillar is over 1000 years old; it is sending out sound frequencies and vibrations that can be physically felt as we are in its presence."

The Incredible Rust-Resistant Iron Pillar of Delhi

<https://www.ancient-origins.net/ancient-places-asia/incredible-rust-resistant-iron-pillar-delhi-001503> News

Tom and Sweet Angelique continued: "We have heard reports from people in the area that portals are opening in its immediate vicinity. A group of intergalactic caretakers have been coming through these opening portals; they are dressed in long white Grecian robes. There are local news reports saying many people have been seeing these beings coming through, simultaneously with bolts of lightning happening right in the same space where the beings emerged into physical visibility."

They said to me, "This pillar is part of the ancient Atlantean grid system* * * that is all around the planet. The Pillar of Delhi is hooked up to the Giza Plateau, and the Temples in Tikal, Guatemala, and all the other sacred sites around the planet."

“Meanwhile, in other news, Lord Rama, Miss Ghislane Maxwell was sentenced to 20 years in prison and the judge said ‘The case is now closed.’ At this point, Tom the Ring-tailed Cat said to me, “Lord Rama, **this is NOT over!** AND it goes right into the D. C. Madam’s Black Book. Place all of this in the Circle of Support and Blaze the Violet Fire! See you in the Light of the Most Radiant One! Sat Nam! Namaste!”

The Incredible Rust-Resistant Iron Pillar of Delhi

In the Qutb complex of Delhi stands one of the most curious metal objects in the world - the so called "Iron Pillar of Delhi", which does not seem to rust, despite being over a thousand years old. The height of the pillar, from the top of its capital to the bottom of its base is 7.2 metres, of which 1.1 metre is underground. The base rests on a grid of iron bars soldered with lead into the upper layer of the dressed stone pavement. The pillar's lower diameter is 420 mm (17 in), and its upper diameter 306 mm (12.0 in). It is estimated to weigh more than six tons."

While several inscriptions are found on the pillar, the oldest one is a six-line three stanza Sanskrit inscription in verse form. As the name *Chandra* is mentioned in the third verse, scholars have been able to date the making of the pillar to the reign of Chandragupta II Vikramaditya (375-415 A.D.), a Gupta king. Although it stands in [Delhi](#) today, how this pillar got there, and its original location is still a subject of scholarly discussion.

One theory suggests that from its original location, the pillar was moved and erected in the main temple at the fortress city of Lal Kot at Dhilli (modern Delhi) when it was developed by the Tomar king, Anangapala II, in A.D. 1050. This is based on an inscription found on the pillar itself. In A.D. 1191, Anangapala's grandson, Prithviraj Chauhan, was defeated by the slave army commander of Muhammad Ghori of Ghazni, Qutb-ud-din Aibak, and Lal Kot fell into the hands of the invading Muslim army. In order to commemorate his victory, Aibak erected a mosque, called the Quwwat-ul-Islam (Might of Islam), in Lal Kot. This mosque was built on the base of a temple, albeit not the one where the pillar was erected. Using archaeological evidence, and facts based on temple architecture, it has been proposed that the pillar was moved from the Tomar temple to its present location in front of the mosque in the Qutb Complex.

As mentioned earlier, one of the most interesting qualities of this pillar is its resistance to corrosion. Several theories have been put forward to explain this phenomenon. These theories fall into two main categories – material factors (favoured by Indian investigators), and environmental factors (favoured by foreign investigators).

One of these theories, the "Mixed Potential Theory" suggests that there is a co-relation between the processing, structure, and properties of the pillar's iron. Based on scientific analysis, it has been shown that these three factors work together to form a protective passive layer of rust on the Iron Pillar of Delhi. As a result, the pillar does not undergo further corrosion, and appears to have not rusted over a thousand year.

Nevertheless, this ability to resist corrosion is not unique to the Iron Pillar of Delhi. Research has shown that other large ancient Indian objects have a similar property. These include the iron pillars at Dhar, Mandu, Mount Abu, Kodochadri Hill, and iron cannons. Hence, it may be said that the ancient Indian iron-workers were highly skilled at forging iron objects. In a report published in the journal *Current Science*, R. Balasubramaniam of the Indian Institute of Technology Kanpur, stated that the pillar is "a living testimony to the skill of metallurgists of ancient India"

The quality of the iron used in the pillar is exceptionally pure and the detail at the top of the pillar demonstrates the skill of the craftsmen. Photo source: Wikipedia

One final thought regarding the Iron Pillar of Delhi: What man can make, man can also destroy. In 1997, a fence was erected around the pillar as a response to the damage caused by visitors. According to a popular belief, it is considered good luck if one could stand with one's back to the pillar and make one's hands meet behind it. Consequently, the protective passive layer of rust on the surface of the iron would have been inadvertently removed by visitors over time, leading to significant wear and visible discoloration on the lower portion of the pillar. It would be a great shame indeed if such monuments that reflect mankind's ingenuity fall victim not to the ravages of time, but to the actions of man himself.

2022-06-28 ANCIENT TECHNOLOGY: METAL CONSTRUCTS

<https://www.galacticfacets.com/ancient-technology.html>

Iron Pillar of Delhi in India

<http://www.ancient-origins.net/ancient-places-asia/incredible-rust-resistant-iron-pillar-delhi-001503>

My theory is that there are still remnants of the applied ancient technology of Atlantis metallurgy and perhaps even examples of the technology itself preserved as metal constructs that do not rust or deteriorate.

Graham Hancock writes about the details with which Plato describes the circular construction of Atlantis and then describes the outer walls.. "The entire circuit of the wall, which went round the outermost zone, they covered with a coating of brass, and the circuit of the next wall they coated with tin and the third, which encompassed the citadel, flashed with the red light of orichalcum."

Graham continues, "Nobody now knows exactly what metal the fabled orichalcum of Atlantis was, since Plato tells us that it survived in his day "only in name".¹

The Incredible Rust-Resistant Iron Pillar of Delhi in India "which does not seem to rust, despite being over a thousand years old."²

Klaus Dona describes two metal towers that are 5,400 meters (3.35 miles) under the ocean near Easter Island. The largest tower is 4,000 meters (2.48 miles) tall. There are concrete and steel type constructs at the site.³
